## **DETAILED ACTION**

### ***Specification***

The abstract of the disclosure should be amended by deleting the word "Figure" in the last line on page 10. Correction is required.

### ***Allowable Subject Matter***

Claims 8 to 27 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art search has not produced any references which teach, suggest, or disclose applicants' claimed object comprising an at least partly electroconductive support or an electric shaver provided with an object comprising an at least partly electroconductive support wherein the claimed object must possess at least two visually-distinct regions in which one region has a protective layer that is an electrochemically-formed outer layer and the other region is a wear-resistant and scratch-resistant sol-gel lacquer layer. The Examiner cites the following patent references as relevant prior art: U.S. Patent No. 3,284,321 (Fromson); U.S. Patent No. 3,450,606 (Darrow); German patent application DE 23 63 667; and Japanese patent application JP 62-278277. The Examiner believes that these patent references do not teach or reasonably suggest applicants' claimed object having at least two visually-distinct regions wherein in one region is an electrochemically-formed outer layer and the other region must be a wear-resistant and scratch-resistant sol-gel lacquer layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
